To all interested parties:

I am pleased to present the Maryland Port Administration's 2016 Foreign Commerce Statistical Report. This report is compiled mainly from foreign trade data produced by the U. S. Census Bureau.

This publication is produced annually by the Maryland Port Administration (MPA) to provide a consistent historical record of foreign trade moving through the Port of Baltimore. The official federal data used for this report does not include the location of U.S. shippers or importers. It is important to understand that the Port of Baltimore serves shippers and importers in numerous states throughout the Mid-Atlantic and Midwest. The data reported herein reflects cargo moving through the Port to or from these many states, not just cargo shipped by Maryland-based companies or individuals.

This report is focused almost exclusively on the Port's foreign commerce. The Port also moves substantial volumes of domestic cargo, which consists largely of raw materials, such as coal, petroleum and cement, which are transported within the Chesapeake Bay or to nearby East Coast ports.

I hope that this publication will serve as a useful reference on foreign commerce in the Port of Baltimore. If you have any questions concerning the information contained in this report, please contact the MPA Office of Planning at (410) 385-4439. Thank you for your interest in the Port of Baltimore.

Sincerely,

James J. White
Executive Director

THE PORT OF BALTIMORE'S WATERBOURNE COMMERCE 2016

Summary:

The Port of Baltimore consists of public marine terminals owned by the Maryland Port Administration (MPA) and privately owned marine terminals. Approximately 90% of all general cargo tons move through the MPA's public terminals, while the private terminals handled most of the Port's bulk commodities.

The Port of Baltimore's foreign cargo tons dropped to 31.8 million tons in 2016 – a decrease of 1.7% from 2015 while the overall value declined 2.4% to \$49.9 billion.

Bulk cargos make up approximately 64% of all international cargo tons moving through the Port of Baltimore yet bulk cargos are only responsible for approximately 5% of the total value. Bulk imports of salt declined by 1.6 million tons in 2016 due to the mild winter of 2015/2016 and were the biggest contributor to the Port's overall decline in tons.

In 2016, the MPA set another record in containers (with 869,485 TEUs) and also set a new high in total general cargo tons with 10.1 million tons.

The Port of Baltimore is ranked as the 14th largest port in the USA in terms of foreign cargo tonnage and 9th largest in terms of dollar value.

Definitions:

Foreign Cargo excludes domestic cargo that moves between U.S. ports and between the U.S. mainland and its territories (i.e. Puerto Rico). The U.S. Army Corps of Engineers reports domestic cargo shipments for the U.S. ports, but this data is not made available until nearly a year after the Census Bureau's foreign cargo data is released.

The vast majority of domestic waterborne cargo within the Port of Baltimore consists of coal, petroleum products, sand and gravel moving within the Chesapeake Bay or to nearby ports along the U.S. East Coast.

The U.S. Census Bureau's data used in this report compiles data by ports within the U.S. When ranking ports on a national basis, ports operating under the same port authority are combined, such as New York / Newark and Savannah / Brunswick.

All data comes from the U.S. Census' USA Trade Online website unless otherwise noted.
