

### **About the Team:**

Joining the Stanley Black & Decker team means joining one of the world's largest, fastest-growing, and most dynamic companies. Stanley Black & Decker is unique in that we've got a rich and storied history dating back to 1843, but that hasn't stopped us from evolving into a vibrant, diverse, global growth company poised and ready for the future.

Being a part of our team means living our core values of integrity, accountability, respect, speed, stretch, vision, and boundaryless. It means thriving in an environment of constant innovation and positive change. It means delivering tools, services, and solutions that the world counts on when it really matters. It means maintaining the highest standards in everything you do, every day.

### **About the Role:**

The Logistics Productivity Engineer will help drive change using a process oriented, data driven, and customer focused approach. This position focuses on data analysis and the development of transportation related process improvements, solution design, and cost savings opportunities within supply chain management. The position will lead, implement and track projects.

### **Essential Duties & Responsibilities:**

- Accountable for year over year cost reduction
- Implementing change without negatively impacting service levels
- Collects and analyzes data for network optimization and supply chain design as an opportunity to identify process improvement and cost savings initiatives for all modes of transportation
- Manage projects from beginning to end, and provide updates to keep functional leads current on projects and timelines associated
- Interact and develop partnerships with outside carriers
- Keep up to date with industry's best practices
- Participate in productivity workouts with cross-functional teams
- Act as liaison between carriers and internal business groups including sales, DCs, plants, and supply chain to ensure transportation needs are met
- Flexibility to cross train and learn other transportation team functions

### **Education /Experience/Key Competencies:**

- Bachelor's degree in Business, Economics, Engineering, or Logistics/Supply Chain Management; Master's degree preferred
- Excellent verbal, written, and quantitative skills with strong attention to detail
- Proficiency in Microsoft Office
- One or more years of project management experience
- Strong analytical and problem solving skills are required
- Self-motivated and possess ability to handle multiple tasks and work independently
- Proven task management skills with the ability to manage multiple tasks at one time, have a sense of urgency and know how to prioritize workload
- Must have excellent organizational and follow up skills

- Must be a goal oriented team player and be adaptable in a fast paced, ever so changing environment
- Minimum two years of professional experience in transportation, logistics, procurement, or related field.
- Travel may be required up to 20%
