To all interested parties:

I am pleased to present the Maryland Port Administration's 2019 Foreign Commerce Statistical Report. This report is compiled mainly from foreign trade data produced by the U. S. Census Bureau.

This publication is produced annually by the Maryland Port Administration (MPA) to provide a consistent historical record of foreign trade moving through the Port of Baltimore. The official federal data used for this report does not include the location of U.S. shippers or importers. It is important to understand that the Port of Baltimore serves shippers and importers in numerous states throughout the Mid-Atlantic and Midwest. The data reported herein reflects cargo moving through the Port to or from these many states, not just cargo shipped by Maryland-based companies or individuals.

This report is focused almost exclusively on the Port's foreign commerce. The Port also moves substantial volumes of domestic cargo, which consists largely of raw materials that are transported within the Chesapeake Bay or to nearby East Coast ports.

I hope that this publication will serve as a useful reference on foreign commerce in the Port of Baltimore. If you have any questions concerning the information contained in this report, please contact the MPA Office of Planning at (410) 385-4439. Thank you for your interest in the Port of Baltimore.

Sincerely,

David M. Thomas
Acting Executive Director

THE PORT OF BALTIMORE'S WATERBOURNE COMMERCE

2019

Summary:

In 2019, the Port of Baltimore (POB) had another record year in foreign cargo tons. Import and export tons totaled 43.6 million tons, surpassing the previous mark set last year. The value of foreign cargo that the POB handled was \$58.4 billion.

While bulk products make up approximately 72% of the POB's total international cargo, general cargo products account for 92% of its value.

In 2019, the Maryland Port Administration (MPA) handled a record 11.1 million tons of general cargo at the State owned marine terminals. A record 1,073,749 TEUs of containers were handled and marked the 10th straight year of growth in containers. Also, the POB handled over 857,000 auto units – which beat last's years record.

The Port of Baltimore is ranked as the 11th largest port in the USA in terms of foreign cargo tonnage and 9th largest in terms of dollar value.

The Port of Baltimore consists of state owned marine terminals managed by the MPA and privately owned marine terminals. Approximately 90% of all general cargo tons move through the MPA's public terminals, while the private terminals handled most of the Port's bulk commodities.

Definitions:

Foreign Cargo excludes domestic cargo that moves between U.S. ports and between the U.S. mainland and its territories (i.e. Puerto Rico). The U.S. Army Corps of Engineers reports domestic cargo shipments for the U.S. ports, but this data is not made available until nearly a year after the Census Bureau's foreign cargo data is released.

The vast majority of domestic waterborne cargo within the Port of Baltimore consists of coal, petroleum products, sand and gravel moving within the Chesapeake Bay or to nearby ports along the U.S. East Coast.

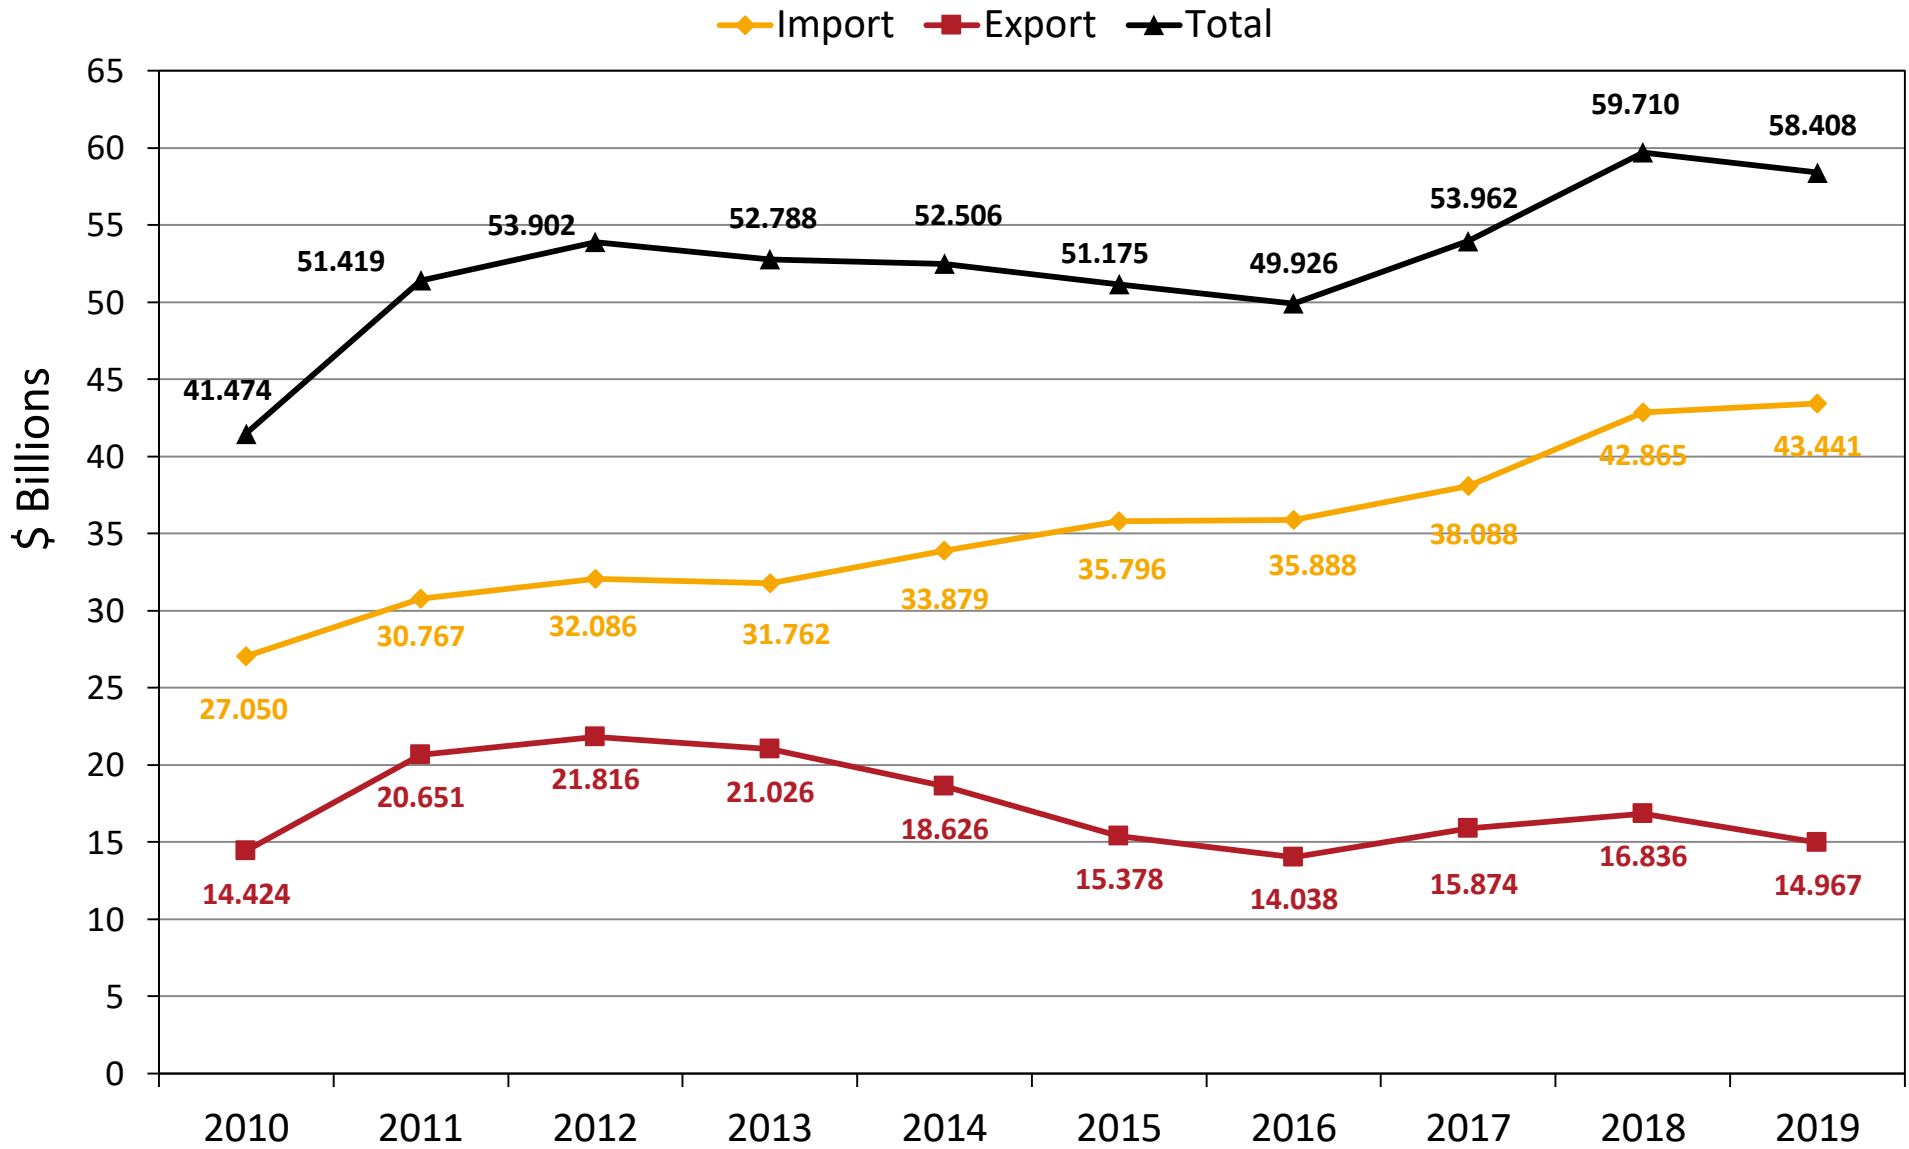

General cargo is defined as containerized cargo, automobiles, agriculture/construction machinery (Ro/Ro) and break bulk shipments of forest products, steel, etc.

The U.S. Census Bureau's data used in this report compiles data by ports within the U.S. When ranking ports on a national basis, ports operating under the same port authority are combined, such as New York / Newark (Port of NY/NJ) and Savannah / Brunswick (Georgia Ports).

All data comes from the U.S. Census' USA Trade Online website unless otherwise noted.
