### Dredging is for the Birds Tree Swallows: The Blue Acrobats in the Sky

Tree swallows (*Tachycineta bicolor*) are one of Maryland's earliest migratory birds, well-known for their shiny deep-blue back and white front, and superb aerial acrobatics twists when after yummy insects. The first birds arrive in late February and usually begin nesting in March. They nest in tree cavities or nest boxes. Breeding season usually ends by late July, then the birds begin staging in large numbers along the coast.

Unlike most swallows, which are mostly insectivorous, tree swallows also eat berries to survive the colder months - particularly bayberries along the coast. Although common at all our dredge materials sites, they are most numerous at [Poplar Island](#). Also, thousands of these majestic birds can be observed at [Assateague Island](#) in October - it is quite a spectacle to behold!

## Port Receives EPA Grant to Reduce Emissions

The Port of Baltimore was awarded a \$1.8 million grant from the U.S. Environmental Protection Agency (EPA) for their Diesel Equipment Upgrade Program. The grant will help the Maryland Department of Transportation Maryland Port Administration (MDOT MPA) replace older cargo-handling equipment and dray trucks with more efficient models.

MDOT Deputy Secretary Earl Lewis said the grant was “an important tool in our ongoing efforts to be greener and to advance Maryland’s response to climate change.”

The funds from the Diesel Emission Reduction Act (DERA) will replace four-yard trucks, six forklifts, one mobile welding unit and three heavy-duty dray trucks—the first electric-powered dray trucks to serve the Port.

“This grant funding will support the replacement of cargo handling equipment and dray trucks with cleaner models that will reduce emissions at the Port and surrounding communities,” said EPA Region 3 Administrator Adam Ortiz.

## COMMUNITY

### Masonville Cove’s First National Literacy Celebration

Masonville Cove kicked off its inaugural National Literacy Celebration on April 9th. Local children’s author Aja Dorsey Jackson signed copies of her new book, “Plane Jane and the Capital Bee.” Then families enjoyed an entertaining and informative planting demonstration with U. S. Fish & Wildlife biologist, Dr. Ela-Sita Carpenter, followed by a themed make-and-take activity. The books were purchased and donated by the [Harbor City Links](#).

“Working for the Brooklyn and Curtis Bay Coalition during Masonville Cove’s early restoration period, I spent a lot of time writing about the Cove and following its progression,” said Ms. Dorsey. “Being able to come back now as an author and share my words with the community in a different way and to see Masonville Cove where it is today feels like a full-circle moment and is incredibly special to me.”

## Celebrate Trails Day 2022 Held at Masonville Cove!

Masonville Cove was honored to be one of the host sites for this year's "National Celebrate Trails Day", April 23<sup>rd</sup>. Celebrate Trails Day is an annual spring celebration of America's trails created by [Rails-to-Trails Conservancy](#) (RTC) in 2013. This national event is hosted on the fourth Saturday of April to raise awareness and encourage people across the country to enjoy our nation's beautiful trails and trail systems. There are approximately three miles of trails at Masonville Cove.

[Nature Worx](#) led a great mindful walk at Masonville Cove with 10 adults and four children that participated in a peaceful saunter down to the shoreline and around the vernal pool. These guided walks help participants get in tune with nature around them for a more relaxing experience. The trails at Masonville Cove are open 9 a.m. – 4 p.m., Monday through Saturday. The next free mindful walk with Nature WoRx (register [here](#)) will be held June 2<sup>nd</sup> at 5:30 p.m. OR enjoy an opportunity for a fun, self-guided trail scavenger hunt to win a prize (no registration required). This is a free family friendly experience.

# OUTREACH

# U.S. Department of the Interior Secretary Deb Haaland visit to Masonville Cove

There were some very special guests visiting Masonville Cove! [Department of the Interior](#) Secretary Deb Haaland visited Masonville Cove on March 11<sup>th</sup> as part of her Northeast tour to discuss investments in infrastructure resilience and ecosystem restoration. At the beginning of the visit, a tribal land acknowledgement was given recognizing the site as the ancestral lands of the Delaware Nation of Oklahoma, home to members of the Delaware, Piscataway, Nanticoke, and Susquehannock tribes, and that they were the first stewards and biologists here.

During the visit, Secretary Haaland and [Baltimore](#) Mayor Brandon Scott met [Benjamin Franklin High School at Masonville Cove](#) students and participated in water testing and shoreline cleanup. They also had an opportunity to see the nesting bald eagle pair, learn about the false blue indigo greenhouse project, and community engagement in South Baltimore.

# Recycled Christmas Trees Breathe New Life into Communities across the Bay

Recycled Christmas trees are breathing new life into communities across the Bay. On [Poplar Island](#), the trees have been repurposed as habitat for native wildlife such as the American black duck. Animals in the upper Bay's Plumpton Park Zoo snack on their tasty evergreen branches. And there are countless community tree recycling programs that grind donated Christmas trees into nutrient-rich mulch for local gardens, parks, and landscaping.

With so many beneficial uses, there are plenty of ways for old Christmas trees to find new life. Look into tree recycling programs in your community before the holiday season begins to get the facts and plan ahead. By putting those trees to work after the holidays are over, you can avoid waste while benefiting Bay communities. Visit [realchristmastrees.org](#) to search for Christmas tree recycling programs near you.
