

# Maryland Port Administration Best Management Practice (BMP)

**Title: Power Washing Pavement** 

# I. Purpose

The purpose is to ensure a consistent approach to the power washing of pavement on MPA property.

#### II. Procedures

The following procedures shall be employed when power washing pavement:

- 1. City water may be used as a source of wash water.
  - a. City water may be obtained from an offsite source and transported onsite in contractor-owned holding tanks.
  - b. Contractor-owned holding tanks may be filled using designated hydrants or vessel water points located on MPA property.
  - c. No contractor is authorized to connect to any water source located on MPA property.
    - 1. Most onsite hydrants will be locked to prevent unauthorized connection.
  - d. The MPA Facility Maintenance Office must be contacted at least two business days in advance of the day when use of a hydrant or water pit is needed. The MPA Facility Maintenance Office may be contacted at (410) 633-1113.
  - e. Water use from hydrants will be metered by MPA. Costs for use of city water from an MPA source will include:
    - 1. hourly charge for MPA assistance to access to the water source and metering for a minimum of two hours; and
    - 2. cost of water.
  - 3. Soaps and detergents, preferably biodegradable and phosphate-free, may be used when power washing pavement.
  - 4. All water, soaps, and detergents must be collected. None shall be allowed to enter the waterways of Maryland, including through a Stormwater inlet.
  - 5. A sump pump shall be used to collect wash water during washing procedures.
  - 6. Holding tank(s) shall be used to collect wash water for transport and offsite disposal.
  - 7. Container(s) (e.g., drum, pail) equipped with a lid(s) shall be used to collect residual mud and dirt generated through washing activities for transport and offsite disposal.

# Cleaning Procedures:

- 1. Containment unit shall be set up in the wash location.
- 2. The sump pump shall be used continuously throughout the duration of the washing to pump wash water into the holding tank.
  - a. Any wash water remaining in the containment following use of the sump pump shall be absorbed using absorbent pads and disposed of properly.
  - b. Any dirt, residue remaining in containment shall be collected and disposed of properly.
- 3. The contractor is responsible for transporting wash water offsite and for properly managing wash water for disposal.
- 4. Any solid waste generated through washing shall be collected in a container equipped with a lid and disposed of offsite.
  - a. No solid waste is permitted to be disposed of in MPA waste receptacles.
  - b. Solid wastes shall be managed and disposed of off MPA property according to hazard class (hazardous or non hazardous).

## III. Employee Education

- 1. All contractors conducting washing of used equipment and vehicles procedures at MPA shall provide their personnel with knowledge of:
  - a. BMP implementation at MPA;
  - b. good housekeeping procedures;
  - c. hazards associated with the equipment and materials being used;
  - d. site layout and storm drain locations; and
  - e. awareness of vendor's spill response procedures.
- 2. All incidents or emergencies should be immediately reported to MdTA Police at 410.633.1092. This information should be conveyed to employees and contractors.
